

## Nutritional IV Therapy Menu

### *Hale Signature Cocktail*

- This is our celebrated fast boost IV. Powered by potent antioxidant Vitamin C, Magnesium and B Vitamins. This IV takes only 45-60 minutes and can energize after a long and stressful week or as part of a Longevity protocol. Devoted fans make this IV a weekly to monthly habit. \$135

### *Weight-loss Cocktail*

- This IV is specifically designed to provide your body with essential vitamins and minerals to promote weight-loss through increasing cellular metabolism and detoxification. This IV is recommended once per week for four weeks for maximum benefits at the beginning of your weight-loss program. \$150

### *Performance & Replenish*

- The Performance IV is designed to increase the energy currency of the body and is great for athletes of any level who want to boost their training efforts before a big race or event. The Replenish IV promotes tissue healing and repair by replenishing and relaxing tired or strained muscles. Both IVs provide antioxidants, electrolytes and nutrition for performance or a quick recovery. \$180

### *Hale Energize & Calm*

- This IV is designed for patients with energy that has been depleted by stress from a busy work schedule or illness. This IV contains classic nutrients like Vitamin C, B Vitamins, Amino Acids and minerals. Homeopathics can be added to counteract emotional trauma caused by stress. Additional amino acids can be added to promote relaxation and restful sleep. \$160

### *Hale Immunity*

- When you simply can't afford to be sick, this IV is perfect for cold and flu season. High dose Vitamin C, B Vitamins work to increase white blood cell count production and unique to Hale, homeopathics can be added for additional immune support. \$150

### *Hale Clear*

- This IV is ideal for those doing the Hale Cleanse program, can be prescribed on its own or as the beginning step to any cleanse program. This IV contains phosphatidylcholine, an important phospholipid that helps to regulate production and flow of bile, helping to clear out toxins stored in the liver. Glutathione is added as additional antioxidant support and removal of toxins. \$175

#### The Fine Print:
